

FIRE ALARM GUIDELINES AT MCGILL

Hello,

The central alarm monitoring company Tyco, is presently experiencing important technical difficulties. At McGill, fire alarm systems will function normally in the event of an emergency, however, we must call the Fire Department ourselves in the event an alarm system is triggered.

This is what we need from you in the event of a general fire alarm:

1. Once you have evacuated the building, call 911 to advise of the fire alarm: provide the address of the building.
2. Call Campus Security 514-398-3000 if you are downtown and 514-398-7777 if you are at Macdonald Campus so Security can provide assistance to the Fire Department.

If only the fire alarm panel is beeping, call Campus Security immediately.

Please give this email as wide a distribution as possible in your buildings and to your staff.
