

Students 4 Best Evidence Network

The Canadian Cochrane Centre (CCC) would like to take this opportunity to introduce you to [Students 4 Best Evidence](#), a network for students interested in evidence-based healthcare.

Students 4 Best Evidence is a project that was initiated at the United Kingdom Cochrane Centre (UKCC) to encourage students to become interested in evidence-based decision-making. The UCKK created an online community and website, Students 4 Best Evidence, meant for all students, of any age, in any healthcare discipline, or just students with an interest in evidence.

The website has seen contributions from students from over nine different countries.

We invite you to share Students for Best Evidence with your students so they may have the opportunity to visit the site and get involved.
