

MITACS information session (**open to Faculty of Dentistry too)

The McGill Faculty of Medicine is pleased to invite **faculty members and graduate students** to an information session on Mitacs (www.mitacs.ca) and its various programs to support industry and academic collaborations, given by Mitacs Director of Business Development, Rebecca Reich.

Mitacs-Accelerate is Canada's premiere research internship program. It connects companies with over 50 research-based universities through graduate students and postdoctoral fellows, who apply their specialized expertise to business research challenges. More information can be found in the attached documents.

All researchers and graduate students are encouraged to attend this information session.

Please note that MITACS has several programs running and many Faculty members can benefit from their programs. Please also note that not all programs require an industry partner and the "Mitacs Globalink" can provide international summer students to Faculty paid by MITACS (housing, travel and stipend).

Date: February 6th, 2014

Time: 1:30pm-3:00pm

Place: Rosalind and Morris Goodman Cancer Research Centre, **Room 501**

*****Please RSVP to me directly if you are interested in attending so I can make sure the room we booked is appropriate.**

Regards,

Olivia Novac, Ph.D.
