

Attention DMDII Students,

Hope that everything is going very well thus far with your lab exercises.

As time progresses, please ensure that the screws on your loupes/light are attached correctly before and after the end of your lab sessions. In the past, the screws connecting your light to your loupes would likely be unfastened periodically due to the constant movements of your light (up and down) during lab. In order to prevent screws from falling or losing, make sure to verify appropriately, as I do not have any spare in supply at this time.

On another note, if you have any problems with your instrument, please contact Jessica St-Pierre @ [jstpierre@heine-na.com](mailto:jstpierre@heine-na.com) and make sure to cc me @ [marilyn.sylvester@mcgill.ca](mailto:marilyn.sylvester@mcgill.ca) with your concerns.

Thank you class and have a productive lab session
