

## Submissions for Research Day 2013

A message from the Research Day Organizing Committee:

Dear All,

We are pleased to announce that the **8th Annual Faculty of Dentistry Research Day** will be held on **Thursday, March 28th, 2013 at the Holiday Inn on Sherbrooke Street** (420 Sherbrooke Street West (corner from Rue Durocher) from 10.00h to 17.00h.

As before, the day is dedicated to poster and oral presentations from research trainees, graduate students, postdocs, research assistants and associates supervised by our Faculty members (can be also registered in another Faculty/Department). As usual, we will have an oral program that is formed from submitted abstracts and presenters will compete for prizes for best oral presentations (1st \$500, 2nd \$300, 3rd \$200), and an extended lunchtime poster session with prizes for the top three posters (1st \$300, 2nd \$200, 3rd \$100). In addition, we are introducing a new Knowledge Translation poster prize (\$200), awarded to the students that can best convey their research in a clinical context. **Quality of the submitted written abstracts may be taken into consideration for the poster prize. All competitions are for MSc and PhD students only.**

Oral and poster presentations cover following areas:

- 1) Health and Society / Clinical and Epidemiological Research
- 2) Mineralized tissue biology
- 3) Biomaterials and Tissue Engineering
- 4) Pain and Neuroscience

**The keynote address this year will be at 13.30h from Dr. Suzanne Morin, MD, MSc (Faculty of Medicine, McGill) who will give a talk entitled: "Atypical Femur Fracture Risk in Patients treated with Bisphosphonates"**

We now invite and encourage all graduate students and postdocs to submit an abstract to Research Day using the attached submission form. **The abstract submission deadline is Friday, March 8th, 2013 and the submission is done by email to Ms. Marlene Balena [marlene.balena@mcgill.ca](mailto:marlene.balena@mcgill.ca).** Please email Ms. Balena for a PDF submission form and example of an abstract.

You will be notified by **March 15<sup>th</sup>, 2013** whether your abstract will be presented as an oral presentation or a poster, and at that time you will be given further instructions as to how to prepare your presentation.

Please note that even if you choose a poster presentation you may be invited to give an oral presentation or vice versa. Priority for orals will be given to trainees that have not presented in the oral program before. Detailed program will be available soon after this date.

If you have any questions regarding the event, abstracts, etc, please contact [marlene.balena@mcgill.ca](mailto:marlene.balena@mcgill.ca).

We are looking forward to hearing about your research and putting together again an excellent program.

Regards,

Research Day Organizing Committee
