

# Student Sibling Program

Dear Graduate Students,

We are launching a student sibling program aimed at increasing the interaction between graduate and DMD students.

The intention of this program is to allow DMD students interested in doing research projects to have a "big sib" graduate student that could give advice and guidance.

The details of the program are in the attached document. Graduate students interested in joining the program should ask permission from their supervisor. A simple email from the supervisor or having the supervisor "cc" in the email to the coordinator of the program allowing the graduate student to participate would be enough.

After obtaining approval from the supervisor the graduate student should fill the attached student form and email it to the program coordinator: Mohamed-Nur Abdallah. email: [mohamed.abdallah@mail.mcgill.ca](mailto:mohamed.abdallah@mail.mcgill.ca)

Please contact me for further details

Sincerely yours,

Mohamed-Nur Abdallah

Dr Svetlana Komarova

Dr Faleh Tamimi
