

Dear Class,  
July is special in the Faculty of Dentistry.

There are no classes, but every year we hold a free clinic for adolescents and patients with disabilities. Third-year students provide all the treatment. They're supervised by residents and assisted by pre-clinical students, just like you.

This is your opportunity to help some really needy people and learn something about clinical dentistry along the way.

Are you interested in becoming a Summer Clinic assistant?

The Clinic will be held July 7th – July 31st .  
Your help will really be appreciated!
